

# Clean. Data.

# The Problem

- The majority of analysis time in government, academia and industry is spent on cleaning data sources

# The Product

- XERL: a common format for energy data
- A government requirement for academia and industry to provide a data endpoint in XERL
- A hub for sharing cleaned energy data and APIs (the Github of Energy data)
  - Allow crowd sourced ranking of data sets
  - Provide bounties on missing data sets

	<b>Contribute</b>	<b>Benefit</b>
<b>Academia</b>	Research teams Share APIs CC/OS model	Save research time Datasets in courses Tech transfer
<b>Government</b>	Provides data Convening Standardisation	Energy literacy Jobs Civic engagement Policy analysis
<b>Industry</b>	Data Content Offers up problems	Saves time Product dev. Innovation Market research
